

Road Glide Nacelle Fork Cap Clearance
Cut Template

Left Side

Right Side

CUT: - - - - -

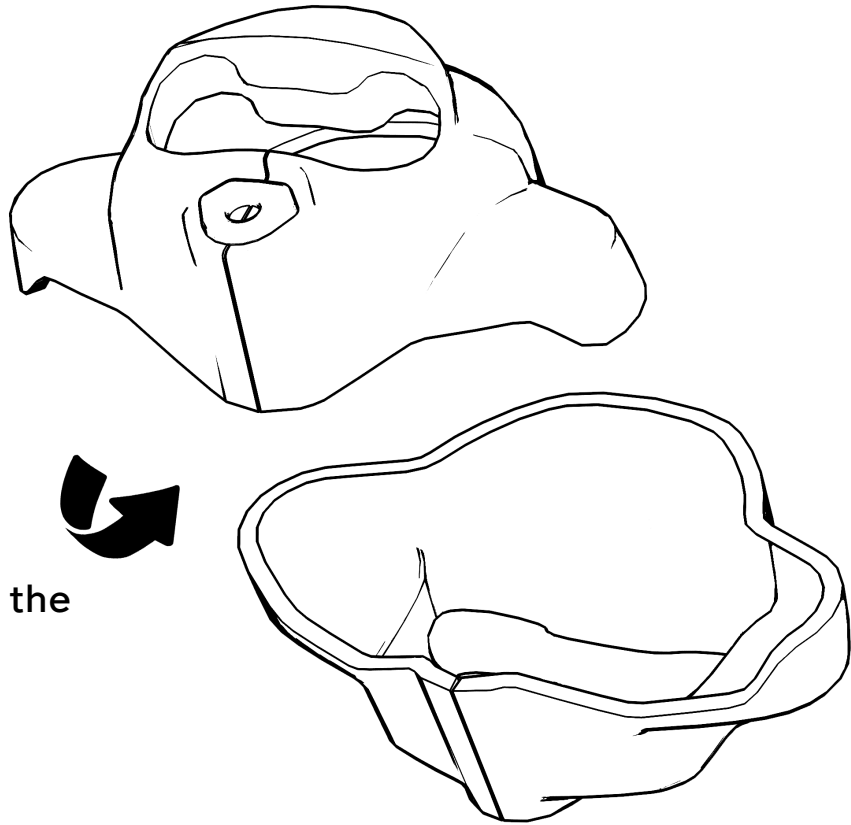

CENTER MARKER: +

2" HOLE SAW OR DREMEL: ○

*Always wear eye protection.

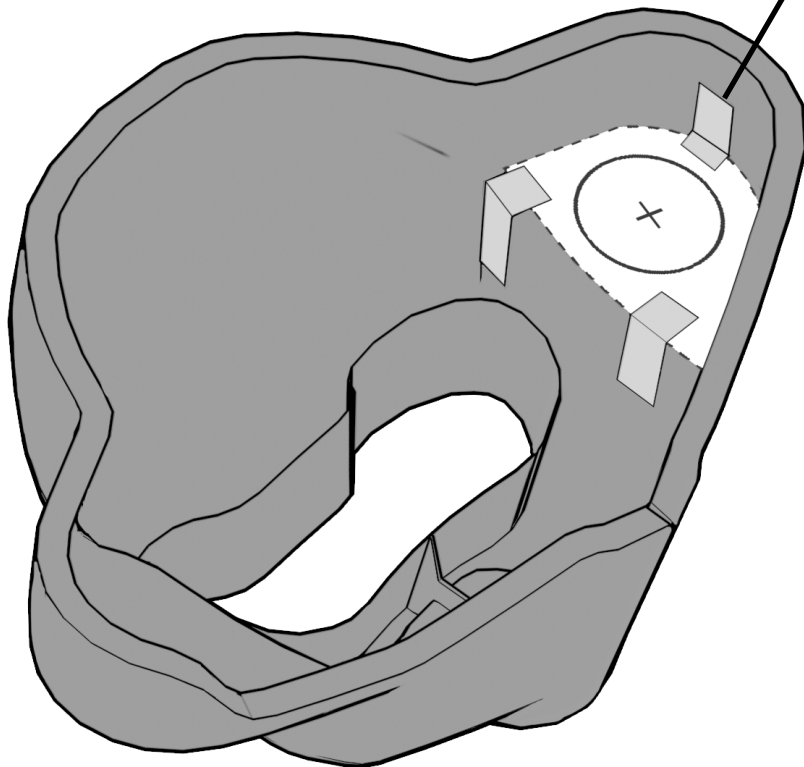

NOTE: Be sure to print in "Actual Scale"

Apply the cut template to the inner flat of the nacelle.

TECH TIP: Secure the cut template in place with tape.

STEP 1: Create a pilot hole into the center marker.

STEP 2: Using the pilot hole as a guide, cut through the nacelle with a 2" hole saw to complete the modification.
