

ERG ADJUSTABLE MOTO BARS ASSEMBLY

- (1) Make sure all screws on the knuckles are loose
- (2) Slide the Knuckles all the way down onto the Lower Bar
- (3) Slide the Left and Right Bars all the way into the Knuckles. Make sure the wire slots are towards the inside and facing down
- (4) Position the knuckles to your desired angle. We recommend starting with about 18 degrees of sweep angle.
- (5) Tighten the pinch screws to 90 in. lbs., one after another in back and forth pattern

NOTE: To reposition the knuckles make sure you first fully loosen all bolts.
